SKILLS

- Individual and family counseling
- Psychological assessments for career and work purposes
- Developmental support for children with special needs
- Empathic and client-centered approach

PROFILE

Psychologist with over 3 years of experience in educational, clinical assessment, and counseling settings. Experienced in providing personalized psychological support to children, families, and multidisciplinary teams. Skilled in conducting psychological evaluations, including occupational and career suitability assessments, coordinating therapeutic programs, maintaining thorough documentation, and facilitating consultations across various institutions. Proficient in delivering training and psychoeducation, managing sensitive client information, and supporting emotional and developmental needs.

PROFESSIONAL ACHIEVEMENTS

- Coordinated and delivered over 100+ parental consultations under an EU-funded initiative, supporting diverse needs across educational institutions.
- Successfully supported parents in resolving behavioral and emotional challenges, including separation anxiety in preschoolers, selective mutism, and intense emotional distress related to various factors, resulting in measurable improvements in child adjustment, emotional resilience, and overall family well-being.
- Conducted over 20 psychological assessments daily, including intelligence, psychomotor, and attention tests, along with structured interviews to evaluate occupational-personality compatibility for professional certification and advisory purposes.
- Designed and implemented tailored support programs for children with autism and special educational needs.
- Developed multidisciplinary observation frameworks, improving efficiency and structure in developmental reporting.
- Delivered training for professionals, translating complex psychological concepts into clear, actionable insights.
